**BANCFIRST** - Seminole Oklahoma Branch Embezzlement, \$3.5 million loss, investigated and audited on site. Reviewed general ledger, cash-in and cash-out tickets, cash-in-transit tickets, warrants, bank wires, individual bank account records, official checks, traveler checks, Casino W2-G's, individual tax returns, and travel activities. Prepared audit work papers, lifestyle and global analysis of personal activities. Provided examples of the manner in which defendant embezzled cash by the preparation of false documents. Provided examples to bank officials, FDIC and FBI Special Agents. Defendant was indicted in the United States District Court for the Eastern District of Oklahoma. Defendant pled and sentenced to seven [7] years of imprisonment with \$3.5 million in restitution.

**OKLAHOMA CITY SCHOOL DISTRICT (2010):** Ms. Sparks was contacted by the administration of the Oklahoma City School District. She was requested to perform an investigation and forensic audit of suspicious financial transactions, school districts employees, and a vendor that was doing business with the school district. Ms. Sparks reviewed school district purchase orders, vendor invoices, conducted several personal interviews with vendor distributors, credit returns to school district employee's personal plumbing business, and several county court records.

Ms. Sparks' conclusion resulted in disclosing several weaknesses directed toward the school district's purchasing controls, segregation of duties, cross-training and spot or surprise internal audits both financial and performance.

Ms. Sparks' findings concluded the Oklahoma City School District was dealing with disturbing instances of coercion, misappropriation of school district money, school district paying for supplies not received, and school district employee/s receiving kickbacks from certain vendors.

**OKLAHOMA CITY SCHOOL DISTRICT (2016):** Ms. Sparks was contacted by the Oklahoma Public Schools administration to complete an Operation Center inventory audit for the purpose of designating light equipment, heavy equipment, annex buildings, and vehicles (including buses, vans, pickups) as surplus in preparation for the district's annual auction.

In addition, I worked directly with the Chief Operating Officer, Director of Maintenance, Director of Custodial, Director of Nutrition and Supervisor of building three's [3] warehouse. A thorough on-site review and inspection were completed for all departments to distinguish surplus from inventory to remain at Operations. Excel spreadsheets were prepared for each department that included the following data: (i) My company control numbers, (ii) District's asset numbers, (iii) description of each item, and original purchase price (if available). In addition, I contacted an auctioneer and coordinated dates and items to be

auctioned. Because there was an abundance of items that had been declared surplus, three [3] separate auctions dates were chosen
